

## Notice of Construction

Construction on the American River Pipeline Conveyance Project is continuing near the Rossmoor river access road. The purpose of the project is to provide treated water to Golden State Water Company (GSWC) to replace groundwater affected by contamination. Aerojet will provide 5,000 acre-feet of groundwater per year to GSWC, which will be treated at Carmichael Water District's (District) Bajamont water treatment plant and conveyed to GSWC.

The Project consists of:

- New pipeline construction beneath the American River from Carmichael to Rancho Cordova
- Old pipeline removal from the American River
- Culvert replacement and bank stabilization
- Stream restoration along the north and south banks of the American River

The removal of the old pipeline from the American river is scheduled for the week of September 12, 2016. Construction may be noisy at times both during, and two weeks leading up to the pipeline removal.

The District appreciates the cooperation and understanding of community members as this work moves forward. If you have any comments or questions, please contact the District at (916) 483-2452. Thank you in advance for your understanding and patience.
